

“How can I prepare to save on my energy bill as temperatures fall?”

There are a number of ways you can reduce energy use and lower monthly bills this fall and winter:

- **Install a programmable thermostat** and set it at 68 degrees or lower - the recommended setting for winter. With proper use throughout the year, you can save about \$180 annually.
- **Schedule a heating system check-up.** A qualified heating contractor can make sure your heating system operates efficiently.
- **Seal air leaks** in your home and **add insulation** to save up to \$200 a year in heating and cooling costs.

“How can I manage my energy use and save?”

DOWNLOAD THE FREE DTE INSIGHT APP.

The app links your smartphone to the smart meter at your home. Now you can:

- Set and monitor an energy budget aligned to your monthly billing cycle.
- Get notifications to see how you're trending towards savings goals and more!

Apply for the DTE Energy Bridge in the app to view energy use in real-time and see the impact of turning things off instantly.

You can lock in DTE as your Natural Gas supplier

When it comes to purchasing natural gas, you have a choice. You have the option to purchase your gas supply from DTE or an alternative gas supplier.

To prevent any unauthorized switching of gas suppliers, we offer an account Lock-In feature. Once locked, it cannot be switched to another supplier until you contact DTE to unlock it. Contact DTE Energy at 800-477-4747 or visit dteenergy.com/gaslockin to learn more.
